

THOR

- NEW GENERATION HIGH PERFORMANCE TERRACE HEATERS
- OUR LATEST IR-X TECHNOLOGY
- HIGHEST EFFICIENCY WITH LONG LIFETIME
- REMOTE CONTROLLED WITH 5 HEATING LEVELS
- PEARL BLACK ALUMINIUM CONSTRUCTION
- AESTHETIC MODERN SLIM DESIGN

OPRANIC®

DEVELOPED TO PROVIDE THE BEST HEAT OUTPUT!

TECHNOLOGY

The technology provides more than double lifetime compared with Classic technology. The IR-X filament together with our tailored reflector especially designed for THOR, radiates heat extra wide, and emits a deep warm glow that creates a warm ambience in your space that is also absorbed very well by humans. THOR with IR-X technology heats objects directly without warming up the air in the environment which avoids energy dissipation and maintains humidity.

HEATS LIKE THE SUN!

Just like the sun heats the earth by absorbing the infrared rays, an OPRANIC infrared heater heats in the same way. With only healthy, highly absorbed infrared rays. It provides a very damp glow (extreme low-glare) and meets the demands of a qualitative infrared heater to heat people.

APPLICATION AREAS

OPRANIC Thor is a high performance portable infrared heater. Available with remote control and adjustable power up to 2000W in five steps. With it's aesthetic modern designed aluminium body in Pearl Black colour, it blends into the most exclusive surroundings. It brings comfort to patios, terraces, verandas, restaurants, semiopen areas, and any indoor or outdoor setting for private or commercial use.

HUMAN ABSORPTION

Depending on the target material to be heated the correct type of heating radiation needs to be chosen since materials have different levels of absorption. Opranic heaters are optimised at output wavelengths which water absorbs the best and reflects the least, giving us, humans, best comfort heating.

OPRANIC - THOR XR & XT

AREA OF USE

THOR can be used everywhere you need extra heat, whether it's in an indoor environment like a garage, basement or outside on the terrace, you can safely use THOR infrared heater. It has automatic tilt switch that turns off the power if it falls and is IP34 certified for outdoor use. THOR has a specially tailored reflector that distributes the infrared rays widely, and with the built-in dimmer (THOR20XR-B), you can adjust the power from 1200W to 2000W in five steps. With our optimised infrared wavelengths, which absorbs the best and reflects the least, you will be able to enjoy a comfortable stay even when the surrounding temperature is low.

SAFETY DISTANCES

MODEL	EAN	COLOUR	CONTROL	POWER (W)	CURRENT (A)	COVERAGE (m ²) OUT- / IN-DOOR	DIMENSIONS (cm) L x W x H	WEIGHT (kg)
THOR15XP-B	7350009970426	Pearl Black	On/Off	1500	6,5	7 / 14	12,7 x 19 x 105	4,2
